

JNANESH BOPANNA A S

Bengaluru, Karnataka, India | **Phone:** +91 7019158594 | **Email:** bopannasomz@gmail.com

LinkedIn: linkedin.com/in/jnanesh-bopanna-a-s | **Year of Graduation:** 2026

PROFESSIONAL SUMMARY

Result-driven **AI & ML Engineering Graduate (Graduation Year: 2026)** with practical experience in **Data Analytics, SQL database querying**, Python data pipelines, and BI dashboarding. Demonstrated expertise in **data cleaning, trend analysis, KPI tracking, and scenario modeling** through an internship at iRobo Automation and end-to-end analytics case studies. IBM & UC Davis certified in SQL, Data Visualization, and Data Analytics workflows. Proficient in **Google Workspace (Sheets, Docs, Slides)**, web scraping, and transforming raw datasets into actionable recommendations for executive decision-making.

TECHNICAL SKILLS & COMPETENCIES

- **Data Analytics & Operations:** Data Analytics, Data Cleaning, Preprocessing, Data Lifecycle, Anomaly Detection, Scenario Modeling, ROI Simulation, Trend Analysis, KPI Tracking, Data Validation.
- **Database & Querying:** SQL (Relational Databases / RDBMS), Data Aggregation, Complex Joins, Data Filtering, MySQL, PostgreSQL.
- **Data Visualization & BI:** Power BI, Tableau, IBM Cognos, Interactive Dashboards, Funnel Charts, Heatmaps, Business Storytelling.
- **Spreadsheets & Tools:** Google Workspace (Google Sheets, Docs, Slides, Gmail), Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Data Modeling).
- **Programming Languages:** Python (Pandas, NumPy, Matplotlib, BeautifulSoup, yfinance), C.
- **Soft Skills & Methodologies:** Problem Solving, Critical Thinking, Technical Communication, Data-Driven Strategy, Team Leadership, Cross-Functional Collaboration.

WORK EXPERIENCE

Data Analyst Intern | iRobo Automation Pvt. Ltd. (Feb 2026 – May 2026)

- **Data Cleaning & Transformation:** Executed end-to-end data cleaning, preprocessing, and validation on structured datasets using **SQL** and **Excel**, ensuring 100% accuracy in performance reporting.
- **Interactive KPI Dashboards:** Designed, built, and optimized dynamic **Power BI** dashboards to monitor core metrics, operational KPIs, and trend shifts for executive decision-making.
- **Insight Generation & Anomaly Detection:** Performed custom exploratory data analysis to identify operational anomalies, isolate root causes, and uncover actionable business recommendations.
- **Stakeholder Reporting:** Synthesized complex quantitative analysis into concise visual reports, presenting data-driven insights to team leads and business stakeholders.
- **Workflow Optimization:** Streamlined reporting efficiency by organizing relational dataset structures and standardizing weekly dashboard maintenance workflows.

FEATURED ANALYTICS & DATA SCIENCE PROJECTS

Aarki Marketing Analytics & What-If ROI Simulator (Power BI, Excel, Data Modeling)

- **Multi-Variable Conversion Analysis:** Processed and analyzed a 3,000+ lead marketing dataset to evaluate monthly closed rates, channel performance (Google Search 9.91% vs Google Content 4.07%), and demographic drivers (debt level, state regulations, verification scores).
- **3-Page Interactive BI Suite:** Built executive KPI dashboards, lead progression funnel charts, and US state-level heatmaps to track lead degradation trends and partner efficiency.
- **Scenario Simulator & Optimization Math:** Engineered an interactive **What-If ROI Simulator** evaluating CPL price elasticity (\$30 to \$33). Uncovered the '*Optimization Paradox*'—proving that narrowing targets to achieve a 10.26% closed rate collapses lead volume by 37.4% (\$28.2k revenue loss), providing critical trade-off guidance to leadership.

Stock Financial Extraction & Web Scraping Visualization Engine (*Python, Pandas, BeautifulSoup, yfinance, Matplotlib*)

- **Automated Data Extraction Pipeline:** Developed an end-to-end Python script utilizing *requests*, *BeautifulSoup*, and *yfinance* to extract real-time stock price metrics and scrape web HTML financial tables for Tesla (TSLA) and GameStop (GME).
- **Data Preprocessing & Cleaning:** Cleaned raw scraped financial data by stripping currency formatting, handling nulls/empty strings, re-indexing time series data, and structuring normalized Pandas DataFrames.
- **Dual-Axis Correlation Graphs:** Built custom Matplotlib plotting utilities (*make_graph*) to generate side-by-side dual-axis visual graphs comparing historical stock price fluctuations against quarterly revenue trends.

Enterprise Sales & Profitability Executive Dashboard (*IBM Cognos, Advanced Excel*)

- **Enterprise Revenue & Margin Analysis:** Synthesized \$78.4M in total profit, 58K+ units sold, and dealer performance across 10+ global metropolitan hubs (London, Toronto, Miami, Vancouver).
- **Product Category & Recall Sentiment:** Analyzed profit margins across product lines (Computers, Home Office, Kitchen Appliances) and analyzed customer service sentiment hierarchy across system recall categories.

CERTIFICATIONS & CREDENTIALS

- **Databases and SQL for Data Science with Python – IBM / Coursera** (Issued: Jul 2026) | Verify: <https://coursera.org/verify/DCMSUVPRXYUD>
- **SQL for Data Science – University of California, Davis / Coursera** (Issued: Jul 2026) | Verify: <https://coursera.org/verify/BF7R8PIXDGV7>
- **Data Visualization and Dashboards with Excel and Cognos – IBM / Coursera** (Issued: Jul 2026) | Verify: <https://coursera.org/verify/KRO3M3L7QKTO>
- **Introduction to Data Analytics – IBM / Coursera** (Issued: Jul 2026) | Verify: <https://coursera.org/verify/JIFC27PU2B61>
- **Artificial Intelligence Foundation Certification – Infosys Springboard**
- **Introduction to Python – Infosys Springboard**
- **Software Engineering Fundamentals, Development & Testing – Infosys Springboard**

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning | Coorg Institute of Technology

Year of Graduation: 2026 | CGPA: 8.42 / 10 (2022 – 2026)

- **Relevant Coursework:** Database Management Systems (DBMS), SQL, Data Analytics, Python Programming, Machine Learning, Statistical Analysis.

Pre-University Education (Class 12 - PCMB) | St. Joseph's Pre-University College, Bengaluru

Percentage: 83.5% (2020 – 2022)

Secondary School Certificate (Class 10 - CBSE) | St. Joseph's School CBSE, Bengaluru

Percentage: 84.2% (2020)

LEADERSHIP & EXTRA-CURRICULAR ACHIEVEMENTS

- **VTU State Hockey Team Captain & Player:** Captained the CIT Hockey team to victory in the VTU Interzone State Level Tournament (2025); selected for VTU South Zone National University Games (2025–2026).
- **Multi-Sport Athlete:** 4-Time VTU Inter-Zone Hockey Championship Winner (2023, 2024, 2025, 2026); Winner of VTU Mysore Zone Football Tournament (2024).
- **Leadership & Community:** Board of Directors, Rotaract Club — Directed team initiatives, organized student events, and coordinated cross-functional activities.
